From: Principal Deputy
Director 

Subject: FY18 Fish and Wildlife Service NFHAP Project Funding

Working with others to protect, conserve, and enhance fish and their habitats is an essential component of the Fish and Wildlife Service's (Service) mission. To help achieve this, the Service is committed to supporting the National Fish Habitat Action Plan (Action Plan) and the Fish Habitat Partnerships (FHPs) that implement it. The Action Plan is a science-based, voluntary effort to address fish and aquatic habitat issues across the US. In fiscal year (FY) 2018, the Service is providing \$3,966,000 to support cost-shared, strategic fish and aquatic habitat projects that address the goals of the Action Plan. This is an increase of \$794,125 from the FY 2017 funding level.

In FY18, the Service will provide operation support to all twenty FHP's. They each will receive \$75,000 in stable operational support totaling \$1,500,000. The remaining \$2,466,000 of the project funds will be distributed based on each FHP's performance level (PL) score for FY18. Each FHP's PL score was determined by applying the Action Plan Allocation Methodology, adopted in December 2013 and revised in November 2015. The resulting PL scores and respective funding amounts for each FHP can be found in the attachment.

Service funds will be used to support FHP operations, conduct aquatic habitat assessments, and implement on-the-ground conservation projects that address the goals of the Action Plan and align with the mission of the Service. Specifically, the FHP's will use the funds to implement proposed projects identified in their Work Plan and Accomplishment Reports. In case of delays, funds may be carried over to FY19 and used as soon as possible. Additionally, all projects will be tracked and project accomplishments will be reported in the Service's Fisheries Information System.

The Service looks forward to continuing its support of the Action Plan and partnering with the FHPs. If you have questions regarding FY18 Action Plan allocations, please contact David Hoskins, Assistant Director for Fish and Aquatic Conservation, at 703-358-2250 or David_Hoskins@fws.gov.
